Brian Temu

iq58974@umbc.edu in/brian-temu github.com/iam-dante www.briantemu.dev/

EDUCATION

University of Maryland Baltimore County **Aug 2023 - May 2025**
Master's in Data Science *Maryland*

University of Dar es salaam **Nov 2019 – Oct 2022**
Bachelor of Science in Computer Science *Dar es salaam*

Technical Skills

Programming: Python, Go, JavaScript (TypeScript), C/C++, and SQL
Cloud/DevOps: Kubernetes, Azure, Google Cloud, Prometheus, Docker, and Linux
Machine Learning: Deep Learning, Transformers (LLMs),NLP, and, Retrieval-Augmented Generation (RAG)
Frameworks/Libraries: PyTorch, TensorFlow, JAX, MLX, Hugging Face Transformers
Web/Software Engineering: FastAPI, React (Next.js), PostgreSQL, REST APIs, VS Code

WORK EXPERIENCE

Institute of Genome Science, University of Maryland Baltimore **June 2025 – Sept 2025**
Machine Learning/Software Engineer Intern *Maryland*

- Developed and implemented forecasting algorithms to accurately predict future trends in **time series data** using statistical and **machine learning models**
- **Collaborated with research and engineering teams** to prototype and deploy predictive analytics tools, enhancing data-driven decision-making within the institution.
- Designed and optimized a **scalable time series** data platform, improving data ingestion and processing speed for large-scale scientific datasets using influxDB.

Milestones, Inc **Apr 2025 – Aug 2025**
Conversational AI Engineer *California*

- **Developed scalable** FastAPI microservice architecture with **PostgreSQL backend**, handling concurrent voice sessions, automated call recording, transcription workflows, and comprehensive analytics tracking.
- Architected and deployed a **hybrid conversational AI system** integrating OpenAI Realtime API, ElevenLabs TTS, and Twilio Voice for real-time phone-based customer interactions.
- Implemented **intelligent conversation flows** with dynamic system prompting, customer data integration, human agent transfer capabilities, and multi-modal feedback collection via SMS.

Institute of Genome Science, University of Maryland Baltimore **May 2024 – Aug 2024**
Data Science Intern *Maryland*

- **Automated** large-scale **antiSMASH** analyses using **Python scripts** and **shell automation**, identifying biosynthetic patterns in Bacterial Vaginosis **gene clusters**.
- Leveraged **HPC/grid computing** to run parallelized bioinformatics workflows, accelerating genetic marker discovery for targeted Bacteria Vaginosis research.
- **Collaborated with researchers**, aligning computational results with study objectives to refine Bacteria Vaginosis genetic investigations.

Softnet Technologies Ltd **Apr 2022 – Aug 2023**
Software Engineer *Dar es salaam*

- Developed performance critical backend utilities in **C and C++** to support internal tooling and data processing workflows, focusing on memory efficiency and low latency execution.
- Developed and optimized new features using **React** and **TypeScript**, improving user engagement by **15%**.
- **Debugged and refactored** front-end code, reducing production bugs by **25%**, enhancing app stability.
- Led workshops on **TailwindCSS** and Figma, achieving **90%** adoption, reducing reliance on third-party templates.
- Implemented **Agile/Scrum** workflow, achieving **20%** more on-time project deliveries with **95%** sprint goal success.

Tanzania Data Lab (dLab) **July 2021 – Sept 2021**
Machine Learning Engineer Intern *Dar es salaam*

- Used **C++ with OpenCV to optimize** image loading, resizing, and augmentation for large scale datasets, reducing preprocessing time.
- **Engineered** high-quality image datasets through data collection, preprocessing, and augmentation using **Python, OpenCV, and PIL**, ensuring optimal deep learning model performance.
- Developed and fine-tuned deep learning models with **PyTorch**, leveraging **CNN architectures** to improve feature extraction and classification.
- Combined **SQL extracted data** with Python and C or C++ pipelines to support reproducible machine learning workflows

PROJECTS

Eda | *Your AI Learning Assistant* **May 2025**

- Developed an **AI-powered** learning assistant that transforms static documents into interactive study sessions, enabling users to query in a **vector database** and receive instant answers from uploaded PDFs and text files.
- Built a **Go based backend for document processing pipeline**, integrating NLP techniques to extract and analyze content, enhancing platform responsiveness and accuracy.

CineRecall | *Movie Identification Platform* **Feb 2025**

- Developed a dynamic movie recommendation platform using **Next.js** for the frontend and **Flask** for the backend, enabling seamless user interaction.
- Implemented **NLP** techniques to match user inputs with relevant films, enhancing **recommendation** accuracy.

Vision Transformer | *Paper Replication* **December 2023**

- Reproduced and implemented key components of **Transformer architecture and attention mechanisms** in **PyTorch**, ensuring modularity and scalability.
- **Developed custom PyTorch modules** for multi-head self-attention, positional encoding, and feedforward layers, aligning with research paper specifications.

Baltimore Police Department Crime | *Data Analysis* **November 2023**

- Analyzed crime trends using **Pandas and NumPy**, identifying patterns and correlations in crime rate fluctuations over time.
- **Visualized** key insights with **Matplotlib and Seaborn**, creating heatmaps, time-series plots, and bar charts to highlight trends and anomalies.

Real-Time Face-mask Detection System | *Computer Vision* **July 2022**

- Developed a **YOLOv5-based object detection system**, achieving **97%** accuracy on a curated dataset through extensive **model fine-tuning and augmentation**.
- **Built an interactive UI with Streamlit**, enabling real-time visualization and user interaction with detected objects across different scenes.

Awards & Scholarships

Clark-Winchcole Foundation Scholarship **September 2024**
Awarded by the Universities at Shady Grove in recognition of academic excellence within a USG program.

CERTIFICATION

DeepLearning.AI TensorFlow Developer Professional Certificate, Coursera **March 2023**
